Description of the Examination
The Western Civilization II: 1648 to the Present examination covers material that is usually taught in the second semester of a two-semester course in Western Civilization. Questions cover European history from the mid-17th century through the post-World War II period, including political, economic and cultural developments such as Scientific Thought, the Enlightenment, the French and Industrial Revolutions, and World Wars I and II. Candidates may be asked to choose the correct definition of a historical term, select the historical figure whose political viewpoint is described, identify the correct relationship between two historical factors or detect the inaccurate pairing of an individual with a historical event. Groups of questions may require candidates to interpret, evaluate or relate the contents of a passage, a map, a picture or a cartoon to the other information or to analyze and use the data contained in a graph or table.

The examination contains approximately 120 questions to be answered in 90 minutes. Some of these are pretest questions that will not be scored.

Knowledge and Skills Required
Questions on the Western Civilization II examination require candidates to demonstrate one or more of the following abilities:

- Understanding important factual knowledge of developments in Western Civilization
- Identifying the causes and effects of major events in history
- Analyzing, interpreting and evaluating textual and graphic historical materials
- Distinguishing the relevant from the irrelevant
- Reaching conclusions on the basis of facts

The subject matter of the Western Civilization II examination is drawn from the following topics. The percentages next to the main topics indicate the approximate percentage of exam questions on that topic.

7–9% Absolutism and Constitutionalism, 1648–1715
The Dutch Republic
The English Revolution
France under Louis XIV
Formation of Austria and Prussia
The “westernization” of Russia

4–6% Competition for Empire and Economic Expansion
Global economy of the 18th century
Europe after Utrecht, 1713–1740
Demographic change in the 18th century

5–7% The Scientific View of the World
Major figures of the scientific revolution
New knowledge of man and society
Political theory

7–9% Period of Enlightenment
Enlightenment thought
Enlightened despotism
Partition of Poland

10–13% Revolution and Napoleonic Europe
The Revolution in France
The Revolution and Europe
The French Empire
Congress of Vienna

7–9% The Industrial Revolution
Agricultural and industrial revolution
Causes of revolution
Economic and social impact on the working class and the middle class
British reform movement

6–8% Political and Cultural Developments, 1815–1848
Conservatism, Liberalism, Nationalism, Socialism
The Revolutions of 1830 and 1848

Demography
World economy of the 19th century
Technological developments
Science, philosophy and the arts
Imperialism in Africa and Asia

10–12% World War I and the Russian Revolution
The causes of World War I
The economic and social impact of the war
The peace settlements
The Revolution of 1917 and its effects

7–9% Europe Between the Wars
The Great Depression
International politics, 1919–1939
Stalin’s five-year plans and purges
Italy and Germany between the wars
Interwar cultural developments

8–10% World War II and Contemporary Europe
The causes and course of World War II
Postwar Europe
Science, philosophy, the arts and religion
Social and political developments

Study Resources
Most textbooks used in college-level Western civilization courses cover the topics in the above outline, but the approaches to certain topics and the emphases given to them may differ. To prepare for the Western Civilization II exam, it is advisable to study one or more college textbooks, which can be found for sale online or in most college bookstores. You may also find it helpful to supplement your reading with books listed in the bibliographies found in most Western civilization textbooks. In addition, contemporary historical novels, plays and films provide rich sources of information. Actual works of art in museums can bring to life not only the reproductions found in books but history itself.

A recent survey conducted by CLEP® found that the following textbooks are among those used by college faculty who teach the equivalent course. You might find one or more of these online or at your local college bookstore. HINT: Look at the table of contents first to make sure it matches the Knowledge and Skills Required for this exam.

Visit www.collegeboard.com/clepprep for additional Western civilization resources. You can also find suggestions for exam preparation in Chapter IV of the CLEP Official Study Guide. In addition, many college faculty post their course materials on their schools’ websites.

Sample Test Questions
The following sample questions do not appear on an actual CLEP examination. They are intended to give potential test-takers an indication of the format and difficulty level of the examination and to provide content for practice and review. For more sample questions and info about the test, see the CLEP Official Study Guide.
1. Louis XVI’s response to the American Revolution was to
   (A) oppose the revolution because of the threat to monarchy that it represented
   (B) attempt to broker a peaceful settlement between Britain and the United States
   (C) do all he could to remain neutral in the conflict
   (D) support the American cause, first covertly and then with troops, in order to weaken Britain
   (E) use the Revolution as a pretext for arresting those in France who opposed his rule

2. The Partitions of Poland in the late 18th century divided up Polish lands among
   (A) Russia, Prussia and Austria
   (B) Germany and the Soviet Union
   (C) France, England and the Habsburg Empire
   (D) all the victors of the Napoleonic Wars
   (E) the members of the Quadruple Alliance

3. An armistice was signed by Russia and the Central Powers ending Russian involvement in World War I after which of the following occurred?
   (A) The Bolsheviks seized power from Russia’s provisional government in the October Revolution.
   (B) The Central Powers cut Russia off from its allies, making continued military alliance impossible.
   (C) Tsar Nicholas decided to focus more on domestic issues and land reform.
   (D) Russian elections brought an antiwar party to power in the face of widespread opposition to the fighting.
   (E) Germany and Russia signed a secret pact that guaranteed each country expanded territory.

4. “From each according to his ability, to each according to his need.”
   The quote above is most consistent with which of the following systems of thought?
   (A) Social Darwinism
   (B) Communism
   (C) Classical liberalism
   (D) Fascism
   (E) Logical positivism

5. Which of the following is considered one reason why the industrial revolution had its beginnings in England?
   (A) A large number of children were available to do much of the needed industrial work.
   (B) Britain preferred to be economically self-sufficient and limit imports and exports, so industrialization was necessary.
   (C) An extensive colonial system gave Britain access to raw materials and markets for finished products.
   (D) Military innovations benefited British merchants, who adapted new inventions for commercial use.
   (E) Unlike in other European countries, British workers were quick to embrace the time- and labor-saving advances of industrialization.

6. Which of the following European nations was NOT involved in the “Scramble for Africa”?
   (A) France
   (B) Germany
   (C) Belgium
   (D) The Netherlands
   (E) Spain

7. Which of the following was a result of the 1938 Munich Agreement?
   (A) Hitler concluded that the other European powers would not oppose German expansion.
   (B) Germany was divided into sections dominated by the Soviet Union and the United States.
   (C) Germany and Italy formed a military alliance with Japan.
(D) The United Nations was created to replace the failed League of Nations.

(E) Chamberlain's successful negotiations with Hitler led to Chamberlain's election as British prime minister.

8. Rene Descartes’ work is considered influential on science because of its
(A) attempt to synthesize Aristotelian thought with traditional Christian symbolism
(B) insistence on empiricism and direct sensory experience and observation
(C) rediscovery of the work of the ancient Greek and Egyptian astronomers and mathematicians
(D) rejection of the heliocentric view of the universe championed by Galileo
(E) mechanistic worldview emphasizing the separation of the physical realm from human perception

**Credit Recommendations**

The American Council on Education has recommended that colleges grant 3 credits for a score of 50, which is equivalent to a course grade of C, on the CLEP Western Civilization II exam. Each college, however, is responsible for setting its own policy. For candidates with satisfactory scores on the Western Civilization II examination, colleges may grant credit toward fulfillment of a distribution requirement, or for a particular course that matches the exam in content. Check with your school to find out the score it requires for granting credit, the number of credit hours granted and the course that can be bypassed with a passing score.
